

# Social Security Number Trace

Your Social Security Number (SSN) is a vital identity element that you should strive to keep safe. Unfortunately, Experian has detected over 298,000 exposed SSNs on the dark web since 2006<sup>1</sup>. With a stolen SSN, thieves have the ability to ruin both your identity and your finances.

That's where Experian's Social Security Number Trace service can help. With this service, subscribers will receive a report of all names, aliases, and addresses associated with their SSN, as well as notifications of any new occurrences. That way, subscribers can verify any previous activity involving their SSN and receive warnings of possible identity theft in the future.

To enable detection of potential identity theft, the service monitors credit header data in all 50 states. This includes name and address entries submitted to the consumer's credit history by credit grantors, courthouses and government agencies for tradelines, court proceedings, bankruptcies and liens.

Add Social Security Number Trace to your identity management offering today and arm your subscribers with awareness of the use of their SSNs.

<sup>1</sup> Data as of February 2017.

The screenshot shows the IDnotify user interface. At the top, it says "IDnotify A part of Experian" and "Your Plan: Premier Plan | My Account Log Out Welcome, Donald". A navigation bar includes "HOME", "CREDIT CENTER", "IDENTITY PROTECTION", "SUPPORT", and "IDNOTIFY TIPS".

The main section is titled "Social Security Number Trace" with a lock icon and the text "Notifies you of all names, aliases and addresses that become associated with your Social Security Number (SSN)".

There are two main content areas on the left:
 

- NOTIFICATIONS:** A map of the United States with red pins in California (near Los Angeles) and Texas (near San Antonio).
- Table:** A table with columns for "Type", "Date", and "Actions". It contains one entry: "Social Security Number Trace Report" dated "05/16/2017".

Below the table is an "Alias Report" section:
 

- Alias:** DO\*\*\*\* BL\*\*\*\*
- Found On:** May 9, 2008
- Additional Info:** A table with columns "First", "Last", "Source", "Date", and "Rank". The data row shows "DO\*\*\*\*", "BL\*\*\*\*", "PUBLIC RECORDS", "2008-05-09", and "1".

On the right side of the interface:
 

- WHY IS MONITORING YOUR SSN IMPORTANT?:** An image of a person looking at a tablet with a city skyline in the background. Text below explains the importance of monitoring an SSN.
- FAQs:** A section with an "Expand All" button and four questions about recognizing names, old addresses, current names, and time ranges in reports.
